

Advanced MySQL Optimization and Troubleshooting with PMM

Peter Zaitsev,
Founder at Percona
10 June 2023

Lima, Peru 2023

PERCONA
UNIVERSITY

The Presentation

- Intro to Performance Optimization and Troubleshooting
- Intro to Percona Monitoring and Management (PMM)
- Demo

A dark, atmospheric photograph of the Machu Picchu ruins in Peru, with steep mountains and terraced stone structures visible under a cloudy sky. The image is dimmed to serve as a background for the title text.

Performance Optimization and Troubleshooting

Outcomes

- **Developer**
 - I want this damn database to work

Outcomes

- **Manager**
 - I want this database not to cost so much money to run

Outcomes

- **DBA**
 - I do not want to spend too much time and effort keeping Developer and Manager Happy

Queries

- ❑ Executed with Great Performance
- ❑ Correct Result
- ❑ Not Impacting other Applications
- ❑ Not Using Too Much Resources

Database Focus

While We can capture queries and their timing on application side, execution details are only available on Database Side

Application Responsibility

**Application is responsible for
volume and kinds of queries it
generates**

Resource Focus

**Oversubscribed resource can make
even simple queries run slow**

Primary Raw Resources

Resource Utilization

- ✓ Other Queries
- ✓ Database Background Activities
- ✓ Other Processes on the same Node
- ✓ Noisy Neighbors

Approach

It may make sense to approach Performance Optimization and Troubleshooting from Resource side or Queries Side.

Percona Monitoring and Management (PMM) enables both

Percona Monitoring and Management (PMM)

PMM at Grance

- ❑ Purpose build Monitoring/Observability platform focused on Databases
- ❑ 100% Free and Open Source
- ❑ Roll your own, On Prem and In the Cloud
- ❑ Supports MySQL, MongoDB, PostgreSQL
- ❑ Supports Cloud Based database deployments such as Amazon RDS

PMM Provides

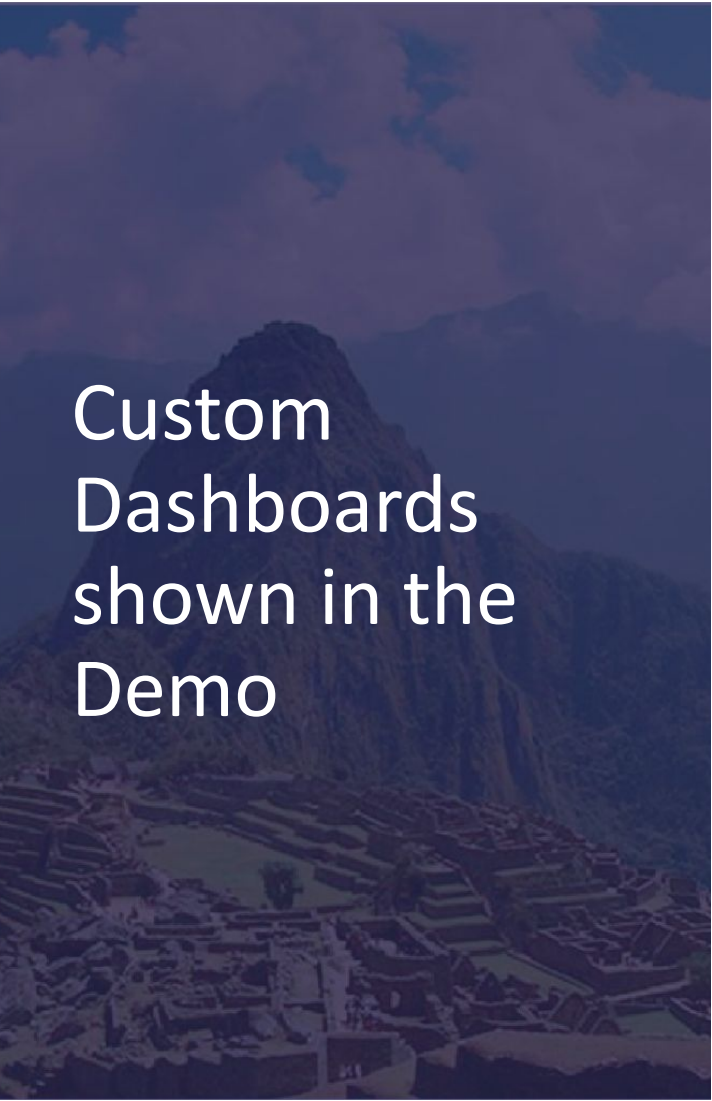

**Bring together your
Devs and Ops to build
better apps faster and
run Open Source
Databases better**

The background of the slide is a photograph of the Machu Picchu archaeological site in Peru. The image shows the terraced stone ruins of the city, nestled in a valley with steep, forested mountains in the background. The sky is overcast with soft, grey clouds. The overall tone of the image is somewhat muted, with a blueish-grey tint.
